

## Why Purchase AlwaysUp OEM?

### Superior Software

AlwaysUp was designed and implemented by senior software engineers with almost 20 years of real-world experience developing robust, mission-critical applications. Our many thousands of clients (such as IBM, Volvo, and ExxonMobil) are a testament to the high quality of our user-friendly software and we stand by it without reservation.

### Exceptional Return on Investment (ROI)

AlwaysUp offers a great value when compared to the cost of building and maintaining your own in-house solution. For example, let us suppose that it takes one of your developers 4 35-hour weeks to complete your own utility. At a cost of \$50/hour, that is already \$7000, a more than 7-fold price increase versus buying our established and tested technology. Be sure to substitute your own numbers to see how much you will save!

### Professional Technical Support

Feel confident knowing that we stand by our product 100% and that we are here to help you with setup, integration, and those problematic client installations. Our highly-technical and courteous staff is available by e-mail or phone (toll-free in the USA) to address your current and evolving needs.

### Free 30-day Trial

Take advantage of our unrestricted 30-day trial to ensure that AlwaysUp will satisfy your requirements. Feel free to contact us if you need a longer evaluation period.
