

## Why Purchase AlwaysUp OEM?

### AlwaysUp is Superior Software

AlwaysUp was designed and implemented by senior software engineers with over 20 years of real-world experience developing robust, mission-critical applications. Our many thousands of clients (such as IBM, Volvo, and ExxonMobil) are a testament to the high quality of our user-friendly software and **we stand by it without reservation.**

And when compared to other solutions like Microsoft's Srvany, AlwaysUp comes out the clear winner. Dig into the details at our web site:

<http://www.CoreTechnologies.com/products/AlwaysUp/srvany.html>

### AlwaysUp offers an Exceptional Return on Investment

AlwaysUp offers a great value when compared to the cost of building and maintaining your own in-house solution. For example, let's suppose that it takes one of your staff 2 40-hour weeks to complete your own utility. At a cost of \$50/hour, that is already \$4,000, an **almost 3-fold price increase** versus buying our established, tested and supported technology. Be sure to substitute your own numbers to see how much you will save!

### AlwaysUp comes with Expert, Professional Support

Feel confident knowing that we stand by our product 100% and that we are here to help you with **setup, integration, and those problematic client installations.** As experts in Windows Services on Windows 7/Vista/XP and Server 2008 R2/2003, we have seen it all. Our highly technical and courteous staff is available by e-mail or phone (**toll-free in the USA**) to address your current and evolving needs.

### AlwaysUp is Risk-Free – try before you buy

Take advantage of our **unrestricted 30-day trial** to ensure that AlwaysUp will satisfy your requirements before you spend a dime! And please feel free to contact us if you need a longer evaluation period.
